One seat now remaining. Is the EPA person interested?

Ok,

I'll tell them.

Diana and Chris both need to attend all four days or wait for another offering.
Coming for a single day has absolutely zero value.

Nancy,

PDP's Diana Haynes and Chris Pappas want to attend. Combined they will be one person. They work very closely together and will be able to share the knowledge. Chris has worked extensively with the samplers. Diana is the current Monitoring Programs Division Director and has worked with PDP for over 20 years.

She is hoping to get someone from EPA (who works closely with PDP) to also attend.

Hi Jo Marie,

If this is the September 14-17 silver springs class, yes, PDP can use one seat - Chris can attend two days and I can attend one. I just shared the information with David Hrdy and David Miller this afternoon. I will see David Hrdy again tomorrow and can ask him then about EPA.

Thanks for keeping us in mind.

Thanks,
Diana

Do you have some folks who can attend?

I have two seats remaining that can be used by PDP
and/or EPA. Do you have contact names?

If you have contacts at PDP and EPA, please forward a
message on to them (I'll send a message with the details
you can forward or copy and paste from! Please copy
me if you can so I know where the message is going.

The intent of this course is to serve people in the DC
area. We have around a dozen FDA at this point. I
have lots of interest from the state of MD and I'm
deciding how many of them to allow in.

If you have room in the class, how about inviting someone from PDP and someone from EPA? They are both in that area.

How about sending your Sampling Supervisor?

I think I'll pass on that one and try to make the next one.

I have AOAC and then BERM and this chapter and then PDP wants me to meet with EPA on sampling in October and I want to meet with Bayer in Carolina on their sampling and plan for a session on sampling at EPRW.

...but I must move the drat chapter forward and at least get a draft to folks so they can help me correct everything. Richard Fussell and Leah Riter said they would contribute and I know that Arpad will want to also, so it will be better to pull a draft together then let them give me input than to just keep delaying.

I find this extremely difficult! Not my thing

Would you be interested in coming to the Sept training again and bring some staff with you? I could pay for your travel (as a WG member). The Irvine training was really great!

I'm anxious to see it too. I just read the 50th year series that Gy wrote. The more I read the more difficult it becomes for me to write but I'm forcing myself to move forward with huge thanks to you and Chuck for the work you have done and allowed me to learn

I can't wait to get the next iteration of GOODSample out to you. It seems to be getting better and better. Maybe by the end of this week. Pitard was generally very complimentary but a couple of his comments led Chuck and I do change the approach in a couple of suggestions. I think you will like it.
